

ADDENDUM 1 TO RFP #001-2022

1. Can you clarify what deliverables and activities you expect related to Breach Mitigation and Response? **The core activity would be to provide training and/or technical assistance to community health centers related to breach mitigation and response planning. The primary deliverable would be a breach mitigation and response plan for each community health center that is updated at least annually.**
2. Are you expecting any technical testing such as vulnerability scanning or penetration testing? **No, although community health centers may request this as an additional service.**
3. Would you be open to the proposal including other optional activities such as group tabletop exercises, workshops, or webinars? **Vendors are welcome to provide pricing for additional services as a supplement/addendum to their quote.**
4. What is the range in sizes of the health centers in terms of number of sites, providers, and the number of systems in scope? **Number of sites ranges from 1-18. Provider information is currently unavailable. Vendor clarification is requested re: what is meant by "systems in scope."**
5. What is the expected timeline for the security assessments? **Annually for up to 21 community health centers.**
6. What is the expectation regarding coordination with the 21 centers? **Vendors should specify what project management services (if any) will be included in the pricing.**
